

District Level School Climate Assessment

Increase Academic Achievement & Attendance while Decreasing Disciplinary Incidents

Community Matters' **Whole School Climate 360** is a comprehensive, district-wide assessment and analysis process that identifies strengths, gaps and weaknesses in a district's climate improvement efforts and/or LCAP plans. **The WSC360** provides administrators with a roadmap for attaining all the mandates needed for success.

"The WSC360 Assessment is the leading edge in school climate improvement efforts. Community Matters takes a deep dive under a district's hood and proposes excellent recommendations."

Daryl Thiesen, Prevention Programs Coordinator II
Kern County Superintendent of Schools, CA

WSC360 Assessments include:

- ◆ Interview select administrators and staff;
- ◆ Review of district discipline policies, procedures, LCAP, student handbooks, etc;
- ◆ Analyze discipline and suspension data;
- ◆ Review of programs and services being provided to students by the district and community youth-serving organizations;
- ◆ Review surveys on school climate, bullying, cyber-bullying, hazing and harassment;
- ◆ Facilitate a two-day meeting of key district stakeholders to review findings, explore best practices and to generate strategies and plans for climate improvement.

5 Stages of the WSC360 WHOLE SCHOOL CLIMATE

National best practices and current research demonstrate that when districts make school climate a cornerstone of their comprehensive and coordinated efforts, schools can effectively achieve increased attendance and improved achievement, while decreasing discipline incidents and improving school safety.

Time & Cost: For time and cost information; please see our [Programs & Services Guide](#)

<http://community-matters.org/downloads/CMProgramsandServices.pdf>

The **WSC360 results** in a report consisting of district-specific recommendations that can be effectively implemented to improve school climate, increase school safety and reduce suspensions. Stakeholder involvement increases buy-in which increases the probability of sustainable implementation and success of your climate improvement initiatives.
